

# FREE BASIC

We can now provide you with a version of Palo Alto Tiny Basic adapted for the MASTER CONTROLLER BOARD. This Basic includes Peek and Poke commands , Input and Output to ports , and the ability to Call assembly language programs. This Basic can work with data in the hexadecimal or decimal form ; making it very useful for control applications.

A programed 2716 is available from us with very limited documentation for \$9.95 plus \$3.50 for shipping.

A complete listing of the Basic is available for \$9.95 plus \$3.50 for shipping.

Both EPROM and listing are available for \$19.90 plus \$3.50 shipping.

Where Is The Free ?

HERE. Since these programs are in the public domain; we encourage you to copy them by any means possible and give them to your friends and neighbors. This includes copying the listings as well as the EPROMs.
